New Documentary Series

We are proud to launch “Infrastructure and Technology,” a documentary series about the growing global infrastructure demands and the technology that can help meet them.

EXCLUSIVE INTERVIEWS WITH INDUSTRY LEADERS

The series was filmed globally in the US, Netherlands, UK, and Germany. Included among the experts interviewed are representatives from Intel, SAP, Industry Consultants, Constructech, Sensor City, and Topcon. They discuss how by adopting technology, the construction industry can increase productivity and help address infrastructure needs now and into the future.
